Q_GoodExample:
What was the horse's name in Dances with Wolves?
<think>
The user is asking for the name of the horse in the film "Dances with Wolves". "Dances with Wolves" is a 1990 film. The main character, John Dunbar, has a significant bond with his horse. I need to retrieve the name of this specific horse from my knowledge about the film. The buckskin horse that John Dunbar frequently rides and considers his own is named Cisco. While there is a wolf named Two Socks, the question specifically asks about "the horse". Cisco is the widely recognized name for Dunbar's main equine companion.
</think>
<answer>
In the movie "Dances with Wolves," Lieutenant John Dunbar's primary horse is named Cisco.
