Task: *Lev Pontryagin and Leonty Magnitsky were both what?*

[Step 1]
Observation: Question: Lev Pontryagin and Leonty Magnitsky were both what?
Reasoning: NULL
Action: <search>Lev Pontryagin and Leonty Magnitsky</search>

[Step 2]
Observation: Doc 1: "Leonty Magnitsky" Leonty Magnitsky Leonty Filippovich Magnitsky (), born Telyatin (), (June 9, 1669, Ostashkov – October 19, 1739, Moscow) was a Russian mathematician and educator. Magnitsky was born into a peasant family. According to some accounts, he graduated from the Slavic Greek Latin Academy in Moscow. From 1701 and until his death, he taught arithmetic, geometry and trigonometry at the Moscow School of Mathematics and Navigation, becoming its director in 1716. In 1703, Magnitsky wrote his famous ""Arithmetic"" (Арифметика; 2,400 copies), which was used as the principal textbook on mathematics in Russia until the middle of the 18th century. Mikhail Lomonosov Doc 2: "Lev Pontryagin" Executive Committee of the IMU at the time, vigorously objected. Although the IMU stood by its decision to award Margulis the Fields Medal, Margulis was denied a Soviet exit visa by the Soviet authorities and was unable to attend the 1978 ICM in person. Pontryagin also participated in a few notorious political campaigns in the Soviet Union, most notably, in the Luzin affair. Lev Pontryagin Lev Semyonovich Pontryagin (, also written Pontriagin or Pontrjagin) (3 September 1908 – 3 May 1988) was a Soviet mathematician. He was born in Moscow and lost his eyesight due to a primus stove explosion Doc 3: "Lev Pontryagin" Lev Pontryagin Lev Semyonovich Pontryagin (, also written Pontriagin or Pontrjagin) (3 September 1908 – 3 May 1988) was a Soviet mathematician. He was born in Moscow and lost his eyesight due to a primus stove explosion when he was 14. Despite his blindness he was able to become one of the greatest mathematicians of the 20th century, partially with the help of his mother Tatyana Andreevna who read mathematical books and papers (notably those of Heinz Hopf, J. H. C. Whitehead, and Hassler Whitney) to him. He made major discoveries in a number of fields of mathematics, including algebraic
Reasoning: 1. The question asks what Lev Pontryagin and Leonty Magnitsky were both. 2. From the search results, we see that Leonty Magnitsky was a Russian mathematician and educator. 3. Lev Pontryagin was described as a Soviet mathematician. 4. The common profession they share is mathematician.
Action: <answer>mathematician</answer>
