a hyper-detailed portrait of a person, soft natural lighting, sharp focus on eyes, realistic skin texture, cinematic depth of field...			✗	

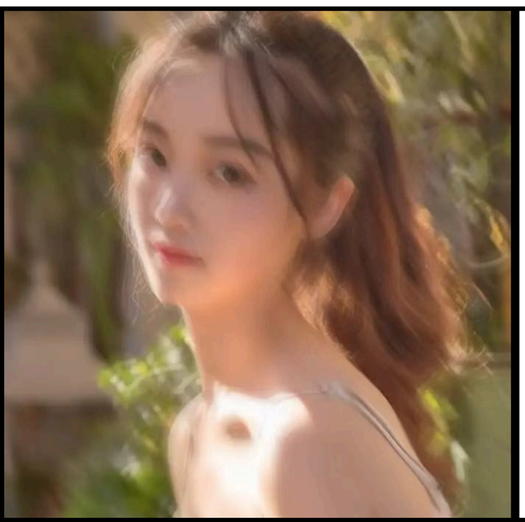

Task Instruction: Create an image from a text description using my custom style/character preset, then automatically upscale it to a much higher resolution with prompt-guided detail enhancement and save the final high-quality result.

Task Input	GPT-5 + Few Shot	GPT-5 + RAG	ComfyAgent-GPT-5	Ours
masterpiece, best quality, ultra-detailed, steampunk airship floating above clouds, intricate gears and brass details, smoke trails, dynamic perspective, warm golden sunlight			✗	

Task Instruction: Expand my image outwards using new, coherent content that matches the style, color, and lighting of the original scene. Guide the expanded area's content according to my text prompts, maintaining the integrity and seamlessly integrating the new area.
