Question
What movie with a television running time of less than 60 minutes features Taylor Lautner?
Q: 76.14
Thought1: At this step, we should identify a topic entity from the question to start a new expression.
Action1: Extract_entity [Taylor Lautner]
Observation1: expression = START('m.07ldhs')
KB Environment
Q: 99.89
Thought2: At this step, we should find the one-hop relation that is connected to the current expression.
Action2: Find_relation [film.actor.film]
Observation2: expression = JOIN('(R film.actor.film)', expression)
Q: 96.97
Thought2: At this step, we should find the one-hop relation that is connected to the current expression.
Action2: Find_relation [tv.tv_actor.starring_roles]
Observation2: expression = JOIN('(R tv.tv_actor.starring_roles)', expression)
Q: 94.92
Thought3: At this step, we should identify a topic entity from the question to start a new expression.
Action3: Extract_entity [60]
Observation3: expression1 = START('60')
Q: 99.97
Thought3: At this step, we should find the one-hop relation that is connected to the current expression.
Action3: Find_relation [film.performance.film]
Observation3: expression = JOIN('(R film.performance.film)', expression)

Q: 73.61
Q: 99.99
Thought5: At this step, we conclude that it is appropriate to end and output the expression.
Action5: Finish [expression]
Observation5: expression1 = STOP(expression1)
Thought7: At this step, we conclude that it is appropriate to end and output the expression.
Action7: Finish [expression]
Observation7: expression = STOP(expression)
