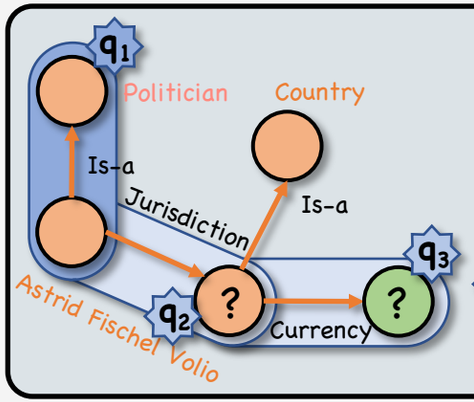
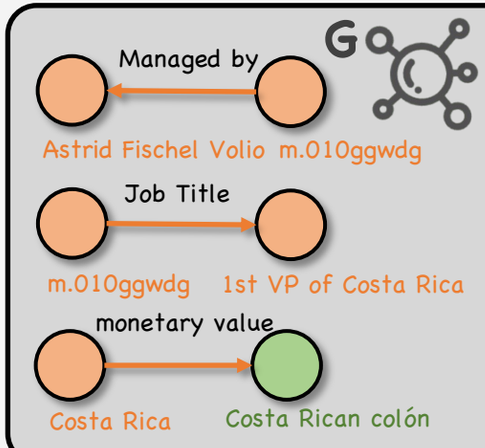
q: What is the currency in the governmental jurisdiction with office holder **Astrid Fischel Volio**?

Step 1: Query-Oriented Knowledge Parsing



Q Query Parsing

- q_1 Who is Astrid Fischel Volio?
- q_2 What areas does Astrid Fischel Volio govern or oversee?
- q_2 q_3 What is the currency in Astrid Fischel Volio's jurisdiction?
- q_i ...

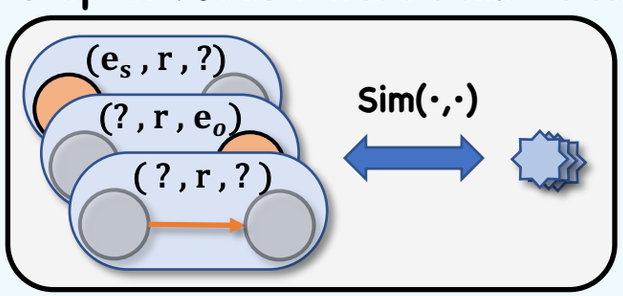


Q^G Graph Parsing

- q^t_1 What's the position managed by Astrid Fischel Volio?
- q^t_2 What's the job title of m.010ggwdg?
- q^t_3 What's the monetary value in Costa Rica?
- q^t_i ... (q^t, e_s, r, e_o)

G^4

Step 2: Focus-Aware Multi-Channel Pruning



Step 3: Structure-Driven Knowledge Enriching

You are a linguist. Based on the given **queries**( ), identify the related **graph queries**( ) and use **similarity, symmetry, transitivity, and hierarchy** to bridge the semantic gap between the user query and the corresponding triples.

G^4 $(q^t \cup q_i, e_s, r, e_o)$
